SKILLS

Artificial intelligence: very good (1 to 3 years)

C#: good

Java: intermediate

Python: intermediate

JavaScript: intermediate

TOOLS I USE

Next.js, TypeScript, Tailwind CSS, PostgreSQL (Neon, Supabase), Vercel, Git/GitHub

LANGUAGES

French: very good

English: good

Turkish: good

Mooré: good

Bambara: good

EDUCATION

Computer Engineering (Bilgisayar Bilimleri Mühendisliği), Gaziosmanpaşa University, Tokat (Türkiye)

PROFILE

Computer engineering student at Gaziosmanpaşa University in Tokat. I build complete web applications and bring artificial intelligence into them. I am looking for a summer 2027 internship, from July to September/October, in Istanbul or Tokat.

PROJECTS

AI orchestration bench — A manager hands work to several agents (Copilot, Gemini, Codex, Ollama), routes each task, falls back when a quota runs out and keeps a delegation log. In daily use.

COMBINE — A platform linking African project founders, incubators and funders: verifiable project file, calls for applications (prototype).

CompTrack — Small-business accounting following the SYSCOHADA framework: dashboard, invoicing, reports. comptrack-chi.vercel.app

UEEMT-Tokat — Online platform of a student association: news, photo albums, member directory, push notifications. ueemt-tokat.vercel.app

SUGU — Small-trade management (products, sales, stock, customers) in four languages, usable offline (in development).

EXPERIENCE

Since 05/2025 YouTube content creation and channel management (full time)

Since 10/2025 Sales assistant, Kadifer Komisyon (part time)

06/2024 – 07/2025 Community manager, The Internet Engineer (part time)

Since 09/2023 Food service assistant, Rai Premium Hotel & Spa, Antalya
